

TSSTM
TOTAL SYSTEM SOLUTION

**LIQUID
BIO-STIMULANT
PROVEN TO ELIMINATE
FOG & TOXIC ODOR IN
GREASE REMOVAL SYSTEMS**

- 1. CUTS MAINTENANCE COSTS**
- 2. ELIMINATES PUMP OUT OF TRAPS AND WATER JETTING OF PIPES, EXCEPT FOR FOREIGN DEBRIS**
- 3. THIS IS NOT AN ENZYME**

ORGANIC TRANSFORMATION OF GREASE REMOVAL SYSTEMS INTO WASTE TREATMENT TANKS

What is TSS?

- A revolutionary organic liquid bio-stimulant created from highly humified peat sources, then liquified through a patented stabilization and extraction process.

What happens to the FOG once TSS is used?

- Stimulates existing microbes.
- FOG is transformed into naturally occurring byproducts of organic degradation.
- Maintain its effect through the pipes leading to the sewer lines without damage.
- Negative downstream effects are reduced dramatically with the use of TSS.

Recommended Uses:

- Restaurants
- Meat Packaging Facilities
- Entertainment Venues
- Medical Facilities

Technical Data:

- Organic
- Non-Toxic
- Non-Corrosive
- Non-Flammable

TESTIMONIALS

“Our use of TSS has reduced our need for cleaning from every other week to 1 cleaning in 6 months – for foreign debris only. Our inspections indicate the grease has been reduced to a trace, and there is no evidence of grease leaching into our plumbing lines leading to the sewers. Overall the product does what it’s designed to do by reducing the cost of grease removal with a green benefit.”

GEORGE EBINGER

*Vice Chairman, NJ Restaurant Assoc.
Owner/Operator
IHOP, Tom’s River, NJ*

“I was a Regional Facilities Manager at Brinker International and Regional Facilities Manager at Denny’s for many years and have sampled countless enzyme and bacteria formulations. I have never seen any substance that can neutralize FOG and toxic gas odor in multiple grease removal systems that encompass grease traps, grease interceptors, lift stations, and subsurface sewage disposal systems that TSS not only does quickly, but lastingly. In many conversations with my colleagues among facilities directors and managers across the country, nothing else has demonstrated the power of this product.”

RAY MCCAUSLAND

*Construction & Facilities Manager
PJ Wheliban’s Restaurant Group*

“Treating the grease removal systems at the sources reduced the grease load coming into the pumping station. We feel that the use of TSS at the restaurants and ACME clearly made a dramatic difference in our treating of this pumping station.”

BILL BUTLER

*Utilities Superintendent
Moorestown Dept. of Public Works*
